# Lorenzo bovit

Freelance **frontend** web developer

## Employment history();

**Frontend developer** August 2022 - Present

🏢 Pixee 📍 Beernem, Belgium

TypeScript Vue.js Node.js Tailwind PHP Laravel  
MySQL

I completely refactored the TV application from Angular 1 to Vue.js using Pinia stores. Additionally, I created an internal library that encapsulates the various TV providers' APIs under a unified interface.

**Fullstack developer** April 2021 - July 2022

🏢 Ticklr 📍 Fully remote

PHP Laravel Tailwind Alpine.js Livewire MySQL

Ticklr is an online vacancy platform where stands central. I was responsible for the admin interface and the integration with vimeo. On the front I built the video recording for the job applications and Q&A interviews.

**Fullstack developer** August 2020 - April 2021

🏢 Strong Supplies 📍 Brugge, Belgium

Node.js TypeScript React GraphQL PostgreSQL

Building out a new GraphQL API in Node.js, PostgreSQL database and a React single page application. The whole stack is written in TypeScript and had type safety from top to bottom using codegen.

**Frontend developer** August 2018 - August 2020

🏢 Massivemedia - Ablo 📍 Gent, Belgium

TypeScript React GraphQL Firebase

Ablo was a new app with the mission is to connect people from all over the world without language barriers using chat and video. The web applications was A React SPA written in TypeScript. We used the apollo client to consume the GraphQL API.

**Fullstack developer**

June 2016 - August 2018

🏠 Massivemedia - Two 📍 Gent, Belgium

Javascript

Redux.js

jQuery

PHP

Memcached

Clustrix

Creating new performant features in PHP for millions of daily active users. Adding REST endpoints and feature flags for the mobile team. Implementing A/B tests and logging the results. Refactored the notifications center and introduced Redux.js for the notifications, likes and visitors.

**PHP backend developer**

September 2014 - June 2016

🏠 VLIZ 📍 Oostende, Belgium

Javascript

React

Bootstrap

PHP

Symfony

MSSQL

Refactor and maintain a legacy PHP codebase. Creating new applications with Symfony, Bootstrap and React. I coached a couple of interns and helped them get up & running with Symfony.
